THEOCHEM, VOLUME 42 (1988)

(Journal of Molecular Structure, Vol. 165)

SUBJECT INDEX

Ab initio interaction potentials,
ab initio interaction potentials of guanidine–formic acid in the neutral and charged states 319

Adiabatic proton transfer,
a theoretical overview of adiabatic proton transfer to HCCH in the $^1\Sigma_g^+$ ground and $^{1,3}A_u$ excited states 353

Alcohols,
resonance delocalization in the anion is not the major factor responsible for the higher acidity of carboxylic acids relative to alcohols 309

Alkanes,
topological indices and their uses: a new approach for the coding of alkanes 243

Aluminum,
electronic structure of the ground and low-lying states of the dimer and trimer of aluminum 21

Arene absorption spectra,
novel applications of topological indices. Part 4. Correlation of arene absorption spectra with the Randić molecular connectivity index 9

Beryllium amides,
the electronic structure of some beryllium amides 65

Bond lengths,
influence of substituents on bond lengths 87

Bond order,
bond order and valence: analogy between the Mayer and the eigenvalue treatments 289

Carbonyl fluoride,
theoretical calculation of the singlet–singlet electronic transition and photochemical reactivity in carbonyl fluoride, trifluoroacetyl fluoride and perfluoromethyl perfluoroacetate 149

Carboxylic acids,
resonance delocalization in the anion is not the major factor responsible for the higher acidity of carboxylic acids relative to alcohols 309

"Chemical Hamiltonian approach",
the "chemical Hamiltonian approach" and the SCF method 255

Computer assistance in chemistry,
molecular logic and computer assistance in chemistry 229

Cycloaddition reactions,
potential energy surfaces of cycloaddition reactions 341

Cyclophanes,
electronic structure of multilayered and multistepped cyclophanes 163

Cyclopropenyl cations,
substituent effects on the relative energies of cyclopropenyl and propargyl cations, $C_3X_3^+$ 37

Dimethylpyrazole,
ab initio calculations on the hydration of dimethylpyrazole and indazole. Solvent effects on tautomeric energies 115

Energy,
energy, geometry and valence: the influence of sulfur *d*-orbital exponent 297

Formic acid,
ab initio interaction potentials of guanidine–formic acid in the neutral and charged states 319

Gamma,
to reach for the unreachable — psi and gamma 177

Geometry,
energy, geometry and valence: the influence of sulfur *d*-orbital exponent 297
